二、說明	6
Part II Core DLL 專案說明.	7
一、專案設定	7

Part I Core EXE 專案說明

(一)專案概要

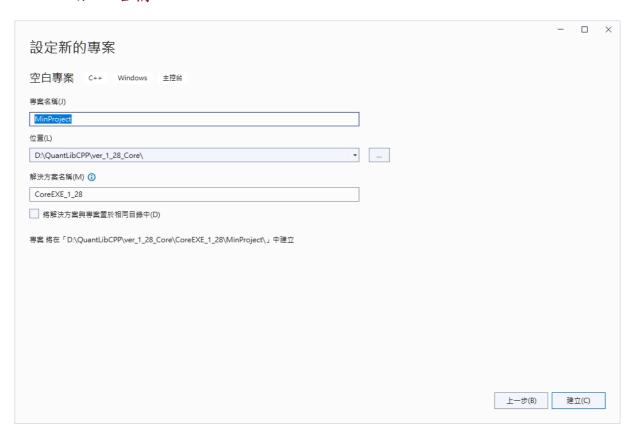

- ◆ 專案設定
 - > 新增專案

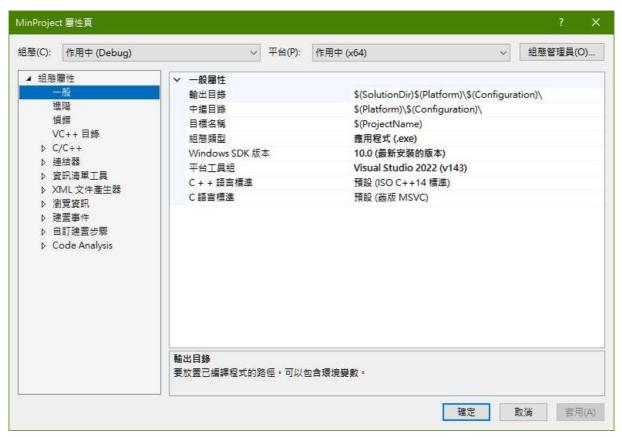

> 專案類型

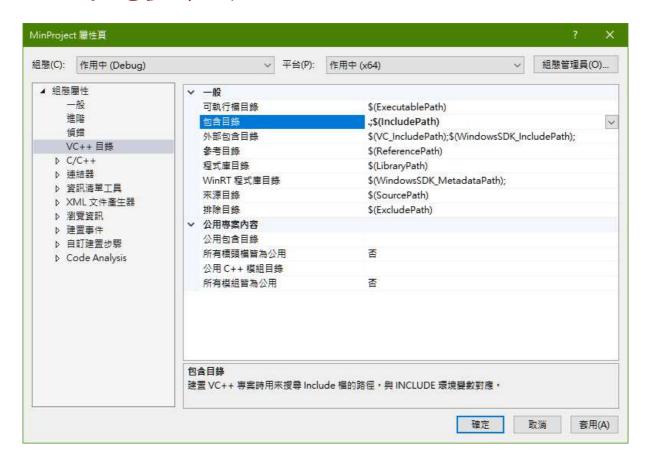

✓ 加入名稱

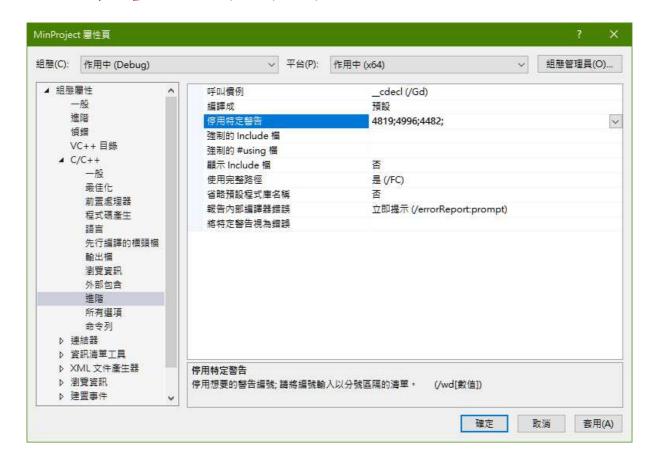

> 專案屬性

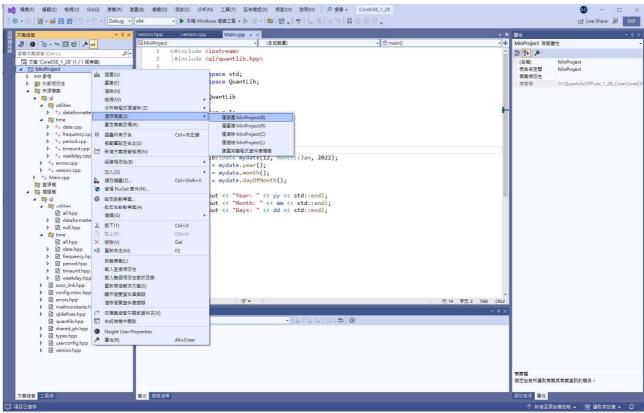

✓ 修正包含目錄,":"。

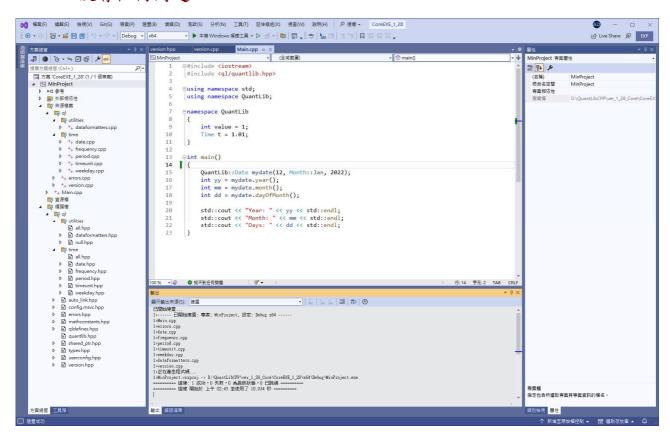

✓ 停用警告, "4819;4996;4482;"。

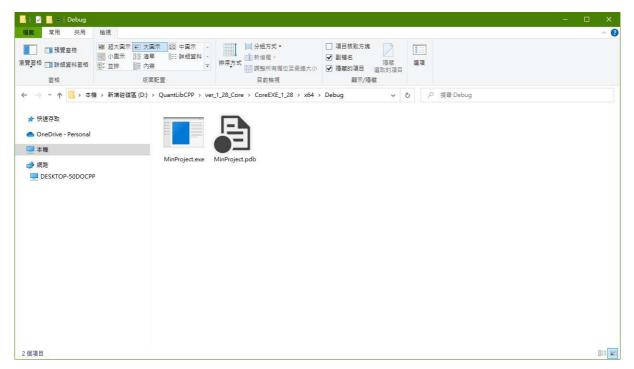

> 編譯

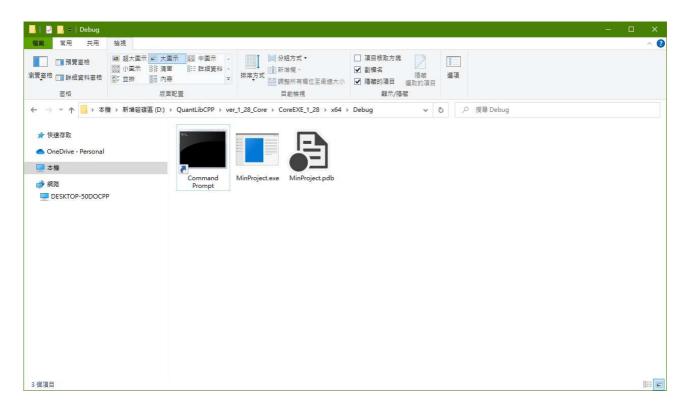

✓ 沒有任何問題

▶ 產出目錄

✓ 加入 Console 連結

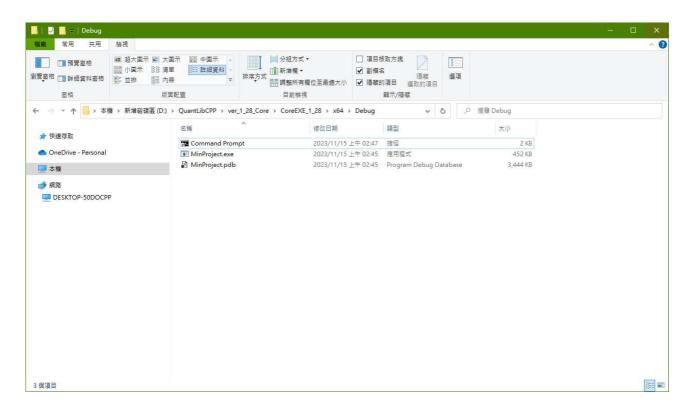

✔ 修改開始位址,

▶ 執行

✓ EXE 檔案 452 Kb。

(二)修改內容的檔案

◆ 有修改的檔案

- \ql\auto_link.hpp
- \ql\quantlib.hpp
- \ql\time\all.hpp
- \ql\utilities\all.hpp

Main.cpp

```
Main.cpp ⊕ ×

➡ MinProject

                                        (全域範圍)
                                                                            → 😭 main()
          ⊟#include <iostream>
          #include <ql/quantlib.hpp>
          ⊡using namespace std;
          using namespace QuantLib;
          ⊟namespace QuantLib
     9
                int value = 1;
     10
                Time t = 1.01;
          }
    11
    12
     13
          □int main()
    14
                QuantLib::Date mydate(12, Month::Jan, 2022);
                int yy = mydate.year();
    16
                int mm = mydate.month();
     17
               int dd = mydate.dayOfMonth();
    18
    19
                std::cout << "Year: " << yy << std::endl;
std::cout << "Month: " << mm << std::endl;</pre>
     20
    21
                std::cout << "Days: " << dd << std::endl;</pre>
     22
